

Date

VIRTUAL PRIVATE NETWORKS (VPN)

- Change dns settings first.

cat /etc/resolv.conf; original server.

~~vim~~

nano /etc/dhcp/dhclient.conf

Change prepend domain-name-servers

↓
DNS

Use openDNS from somewhere other than your country.

Save the file

Type:- service network-manager restart

cat /etc/resolv.conf.

.. If it doesn't work, change using GUI from network settings.
