

Date

→ cat :- Shows entire content of a file
whatever it may be.

→ less :- Neat and organised 'cat'.

→ grep :- Having some partly information from
something. Used with cat.

exp :- cat sources.list | grep src

⇒ This will show all lines in sources.list
containing the word src.

grep -i src ⇒ To ignore case-sensitivity.

→ echo :- Echoing something, nothing special here.

exp :- echo "Hello" > ~~file~~ filename.

echoes Hello to file filename.
