

Date

PROXY CHAINS.

→ nano /etc/proxychains.conf → To configure proxies

Proxies :- HTTP → for HTTP traffic.
SOCKS4
SOCKS5 → Best.

Make sure you are using SOCKS5 only.

Most commonly used and most stable one]→ Dynamic chain
↓
Must be there for TOR connections.

Open proxychains.conf from terminal in nano to get all the information.

Date

Writing proxychains (Options).

Name	IP address	Port no.	username	password
socks5	192.168.67.78	1080	lamer	secret.
socks4	192.168.1.49	1080		
http	192.168.89.3	8080	justu	hidden

Using proxychains:

As owner user,
proxychains firefox www.duckduckgo

If not working,

service tor start
service tor stop
service tor restart

Try again.
